GENERAL INFORMATION

The Hunt County Appraisal District (CAD) is a political subdivision of the State of Texas created effective January 1, 1980. The provisions of the Texas Property Tax Code govern the legal, statutory, and administrative requirements of the appraisal district. An 8 member board of directors, appointed by vote of the governing bodies of the taxing authorities in the district, constitutes the district's governing body. The chief appraiser, appointed by the board of directors, is the chief administrator and chief executive officer of the appraisal district.

In 2022, the appraisal district appraised 72,202 parcels of property with a total value of \$18,366,877,365. All appraisals are completed by the internal staff and contract appraisers with the residential properties being inspected biannually and all property reappraised annually.

PROPERTY TYPES AND VALUE DISTRIBUTION

Most of the tax units offer some level of homestead exemption to 23,264 residential homesteads in the county. All schools are required to grant a \$40,000 value exemption to regular homesteads and an additional \$10,000 of value to Over-65 and disabled persons. Other tax units may grant a percentage homestead up to 20% based on annual decisions by their governing body or voters. In addition, any amount of exemption may be set by tax units for the Over-65 or disabled including schools that would add on to the state mandated exemptions.

Approximately 14.65% of the county is totally exempt from taxation. Other than property owned by local taxing entities, The University of Texas A & M at Commerce is the largest valued exempt taxpayer. Other totally exempt properties include typical properties such as public schools, churches, city and county owned properties, and numerous charitable organizations.

New Market Value of \$566,269,670 was added to the tax rolls. Of that new value, \$553,287,872 was taxable. This represented 3.08% of the Total Market Value. Of that new value, \$517,342,513 was in new residential property and agricultural properties added \$2,727,910. Commercial and industrial real properties added an additional \$26,112,370. The new value of totally exempt property was \$4,100,432.

APPRAISAL DISTRICT RECOGNITION AND CHANGES

Hunt County Appraisal District strives to be recognized state-wide as a leader in accuracy of appraisal and the use of technology to improve appraisals and efficiency of the office as well as providing a taxpayer friendly service to the public. The budget of the District for 2022 was \$3,419,220 or \$47.36 per parcel.

INTERNAL AND STATE RATIO STUDIES

The State Comptroller does a biennial ratio study. The last ratio study for the entire county was performed in 2021 and a summary is included in this report. The Median Level of Appraisal determined by the Comptroller was 98% with a coefficient of dispersion (COD) of 10.19. The price-related deferential (PRD) was 1.02.

The internal ratio study for the 2022 Residential Certified Values indicated a median sales ratio of 98.89%, a weighted mean of 96.33% and an average mean of 97.12%. The COD was 8.111 and the PRD was 1.0082. These internal ratios were performed using verified valid sales from the period June 1, 2021 thru March 31, 2022. These measurements meet the standards set by the International Association of Assessing Officers.

LEGISLATIVE CHANGES

The Texas Legislature meets in odd-numbered years. Customarily, the Property Tax Assistance division of the Texas Comptroller of Public Accounts Office publishes a booklet explaining all the Texas Property Law Changes for that Legislative session.

APPEAL DATA

In 2022, 12,897 value appeals were filed. Of those, 7,715 were handled informally by staff. 1,782 parcels were protested before the Appraisal Review Board. The total value appealed for the year was \$3,605,959,410 which represents 24.72% of all value.

* Category result not calculated. Calculation requires a minimum of five ratios from either of the following:

- Categories representing at least 25 percent of total CAD category value.
- Five ISDs or half the ISDs in the CAD, whichever is less

* *Statistical measures may not be reliable when the sample is small
